## Converting Interface

After clicking the **Convert** button, you will see the converting interface like this:
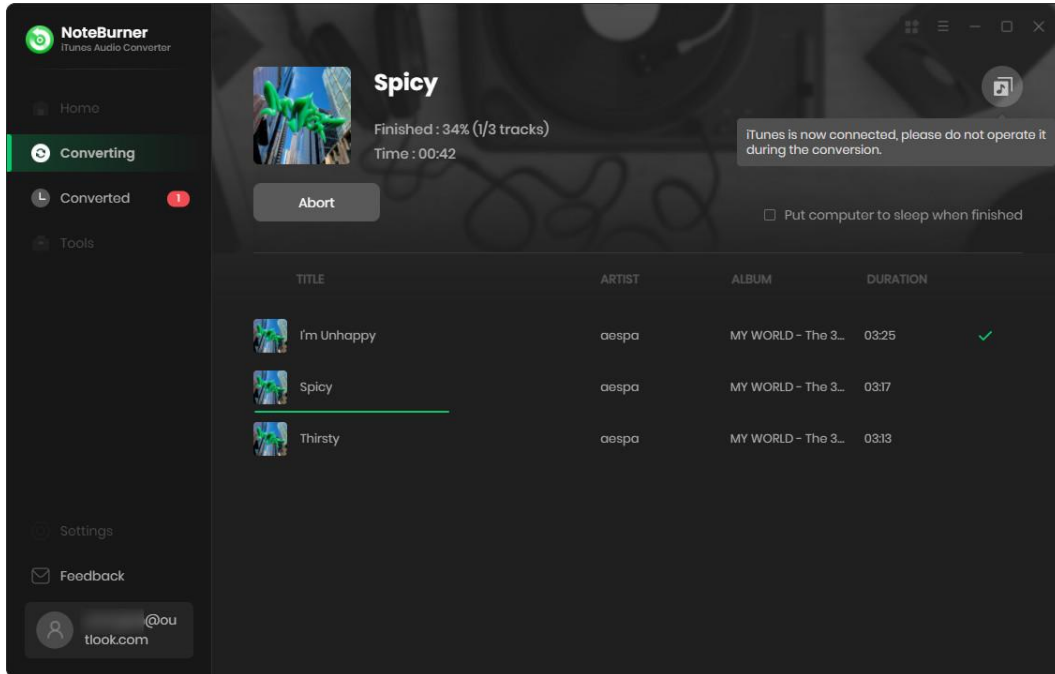

## Menu

When clicking the **Menu** button in the upper-right corner, you will see the menu list like this:

# NoteBurner Audio Recorder for Windows
## Tutorials

### Import Music Files

**Step 1:** Click the "Add" button, then you will see a pop-up window which will show you all the iTunes folders. You can add Apple Music files, audiobooks, and M4P audio as you want.

## Choose Output Format

Click the **Setting** button at the bottom left corner to set the **Output Format** (MP3, WAV, FLAC, AAC, AIFF or ALAC), **Conversion Mode** (Intelligent Mode, iTunes Record, YouTube Download), **Output Path** and so on.

## Customize Output Path

Click the **Setting** button on the bottom left, then you can customize the output directory in the pop-up window.
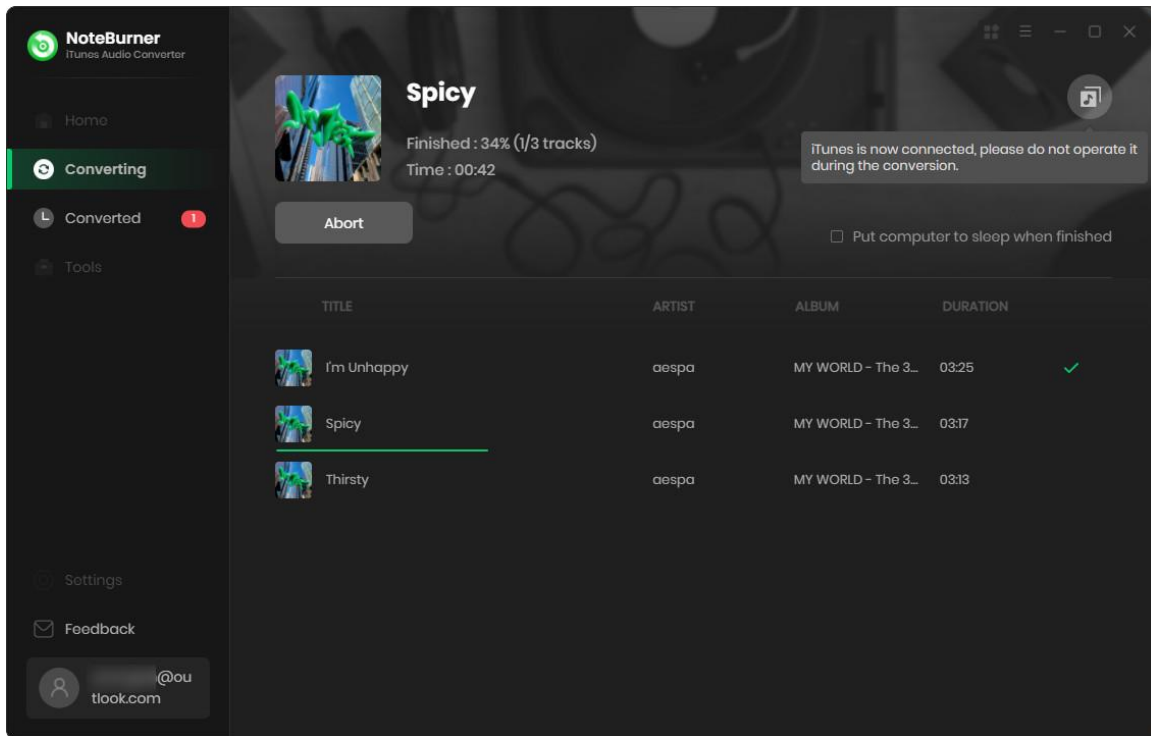

**Tips:**

1. If you don't change the output path, the converted files will be saved in NoteBurner default folder:
   C:\Users\User Name\Documents\ NoteBurner iTunes DRM Audio Converter

2. You can click the ⋯ button to show the output path.

## Convert Apple Music

After finish customization, just click the **Convert** button to start the converting.

**Note:** Before converting, make sure your computer is well authorized with the same Apple ID that you used when downloading the audio and the original file can be played on iTunes.
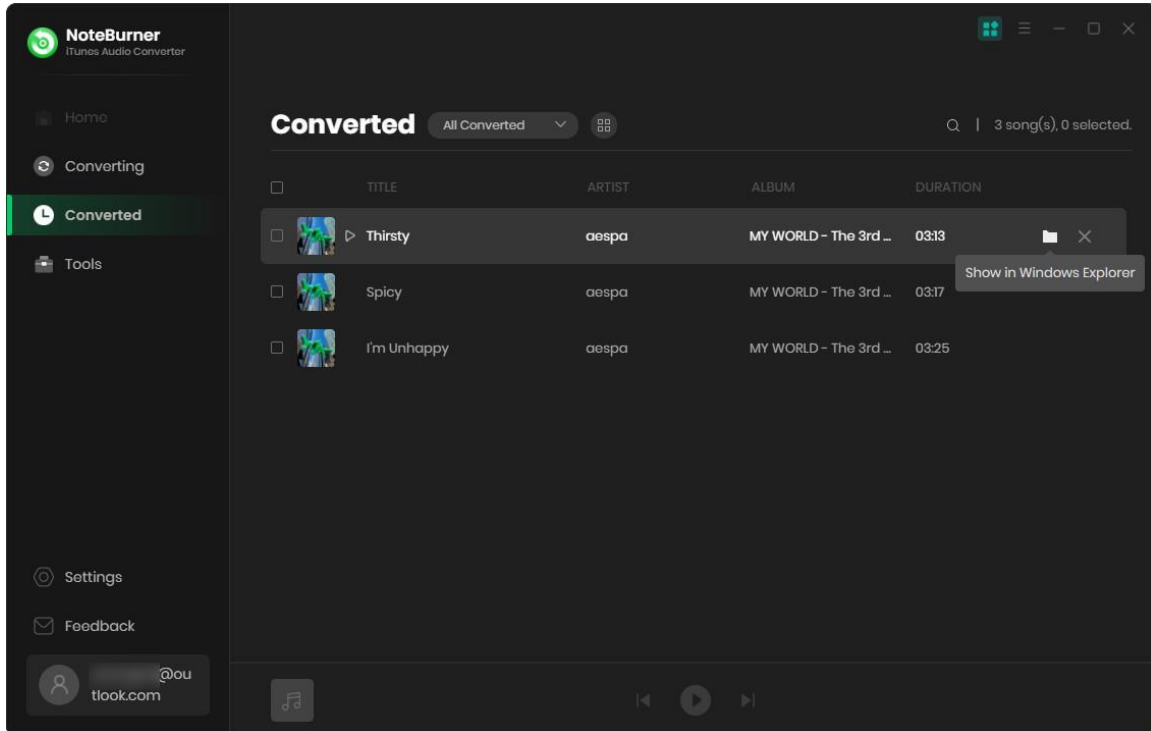

**Warning:** Before the status show converting progress, please don't do anything with iTunes during converting, otherwise the conversion may fail by occurring an error.

## Check Conversion History

When the conversion is completed, the history records will be saved automatically. Click the **Converted** button on the right side to show up the records.

## Edit ID3 Tags

The program retains the original quality of Apple Music and keeps all ID3 tags after conversion. And you can also edit all the important and useful Meta information by clicking **"Tools"** >> **"Edit Tag"**.

## Convert Local Audio

Apart from converting Apple Music, NoteBurner Audio Recorder also supports to **convert the common music to MP3/M4A/AAC/WAV/OGG/AIFF format**. Simply open NoteBurner, click **"Tools" >> "Format Converter"**, and then add the music from your computer to convert.
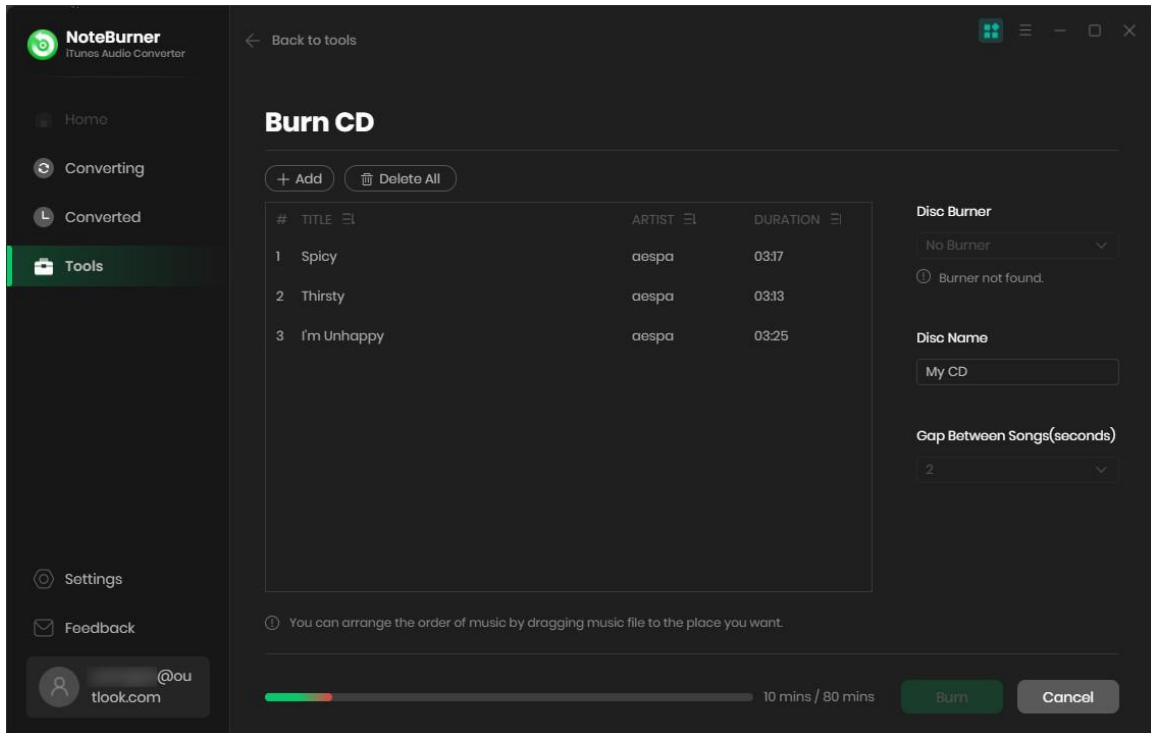

## Burn Apple Music to CD

NoteBurner Audio Recorder also allows you to burn converted Apple Music or local music to CD directly. You can easily go to **"Tools > Burn CD"**, then there will be a pop-up window prompting you to add music from your computer, insert CD, and rename your CD. Then all your songs will be burned into a CD after a few minutes.
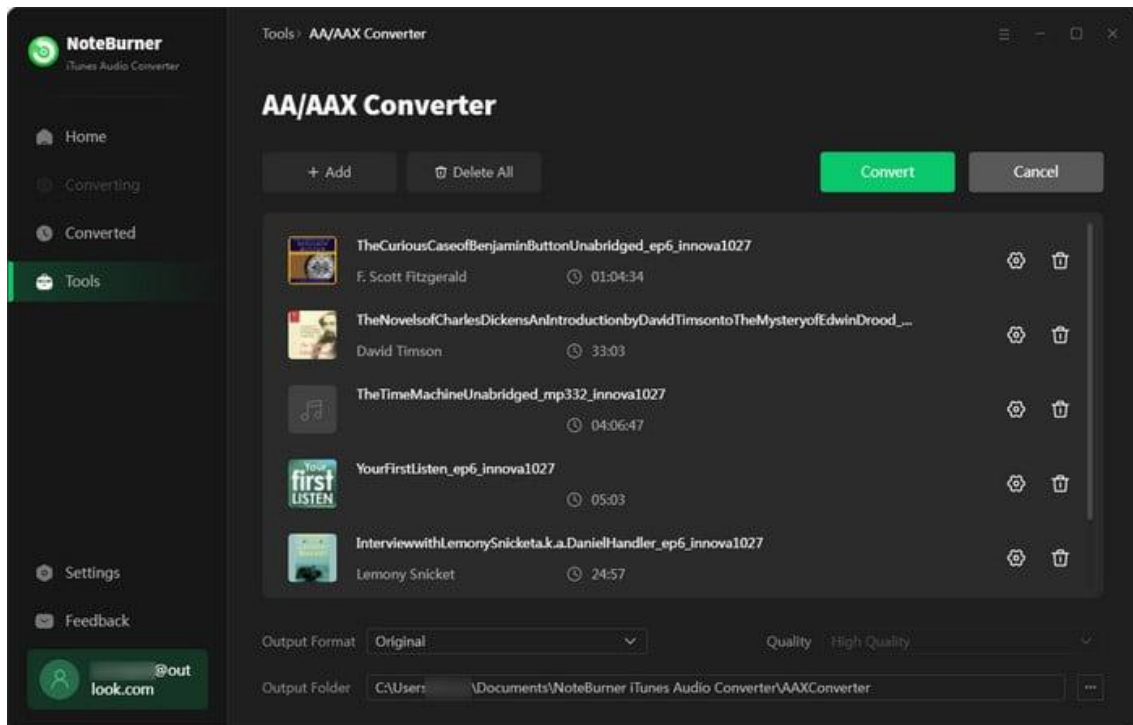

**Convert AA/AAX Audiobook**

NoteBurner also provides an AA/AAX converter to convert your local audiobooks to M4A, M4B, and MP3 formats easily.

## Audio Editor

NoteBurner Audio Recorder also allows you to edit your converted audio files or your local music files. Go to the toolbox to find it.
