- Check Download History

Choose Video Quality

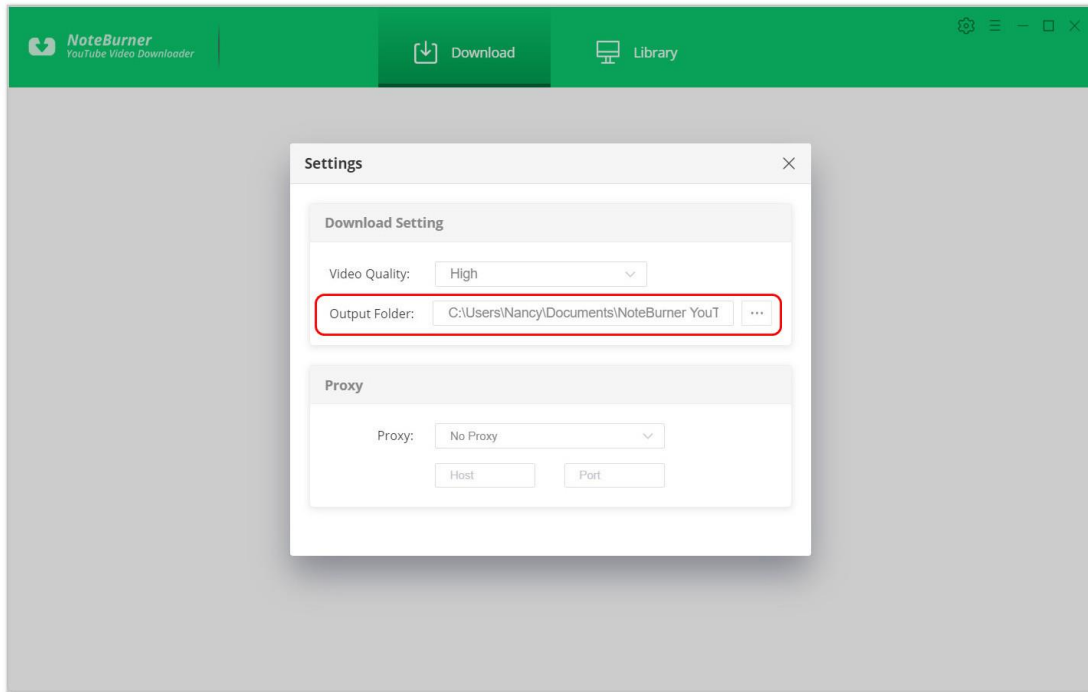

Click the Setting button on the upper right corner to customize the video quality (High, Medium, Low) and output path.

Set Output Path

In the setting window, you can also customize the output path of the downloaded video as you prefer.

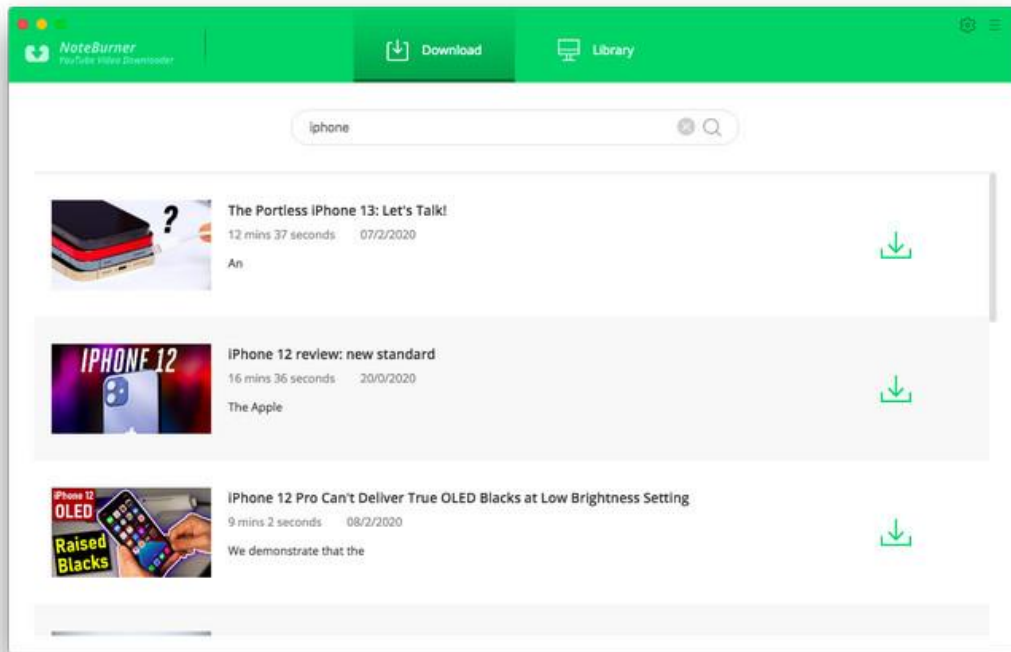

Search for Videos

NoteBurner YouTube Video Downloader applies with a new type of searching mechanism, which will enable users to add videos not only by **copying & pasting the link from YouTube** but also through **entering video's name**. If you don't remember the full name of your favorite videos, simply enter some keywords, the program will list all the related videos for your choice.

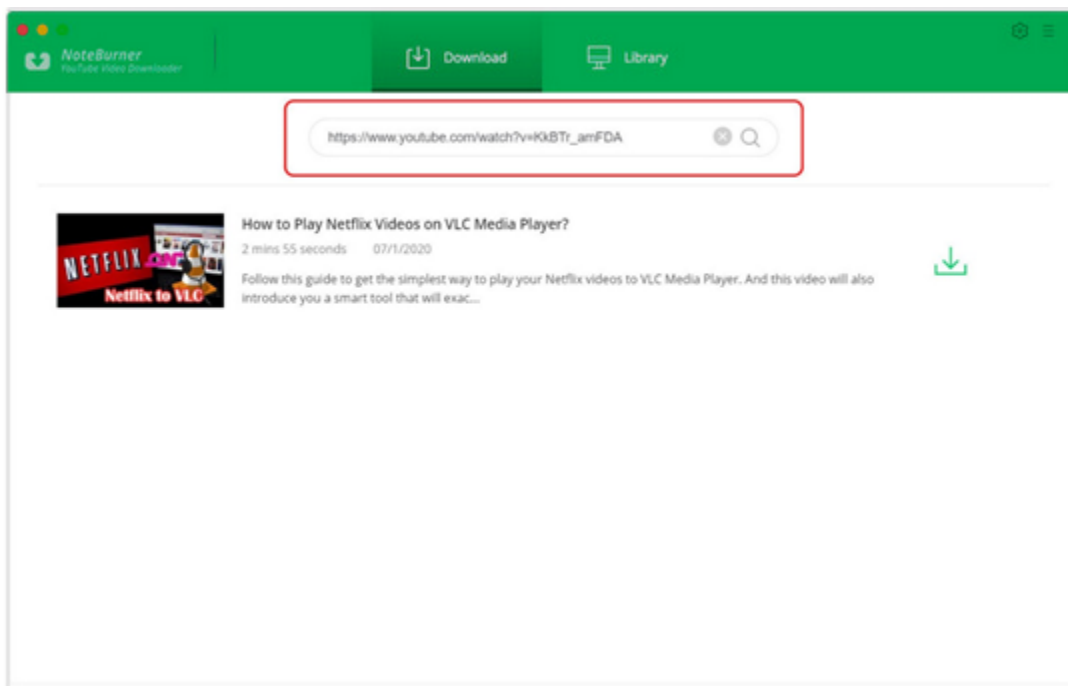

NoteBurner YouTube Video Downloader for Mac

Copy Video Link

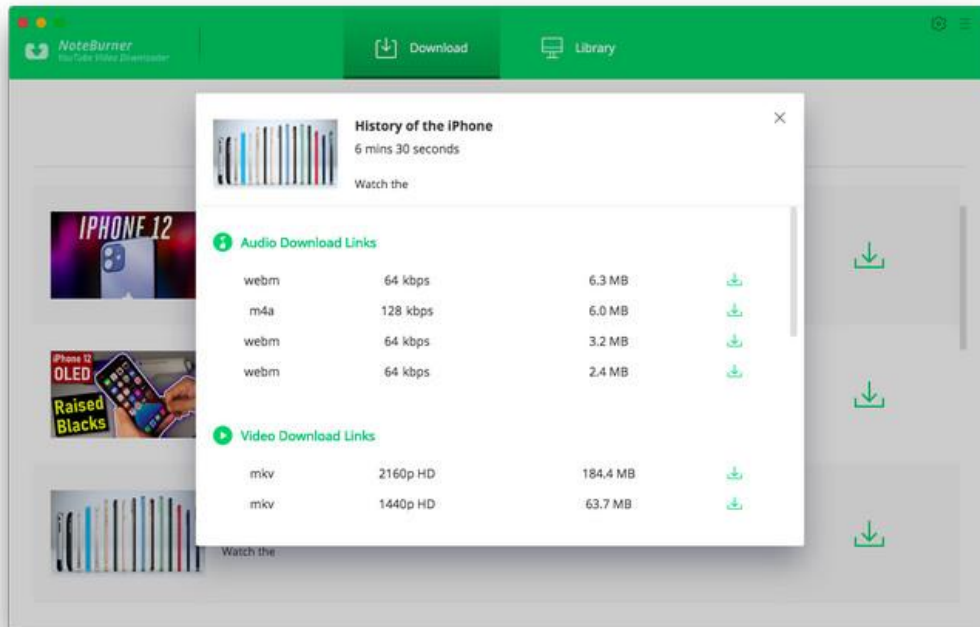

You can also copy the video's link from YouTube to NoteBurner.

Advanced Download

The program will list all downloads option in the "Advanced Download" window, it's allowing you to select the corresponding video or audio in different output format & quality.

Tips about the Video Quality and Format

Video Quality: NoteBurner YouTube Video Downloader can grab videos up to 8K (4320P) in quality. Of course, the quality option is dependent on that of the original uploaded video. If the video was recorded and uploaded in standard definition, it won't be available to download in high definition. And please note that, larger resolution videos will dramatically increase file size and then extend the download time.

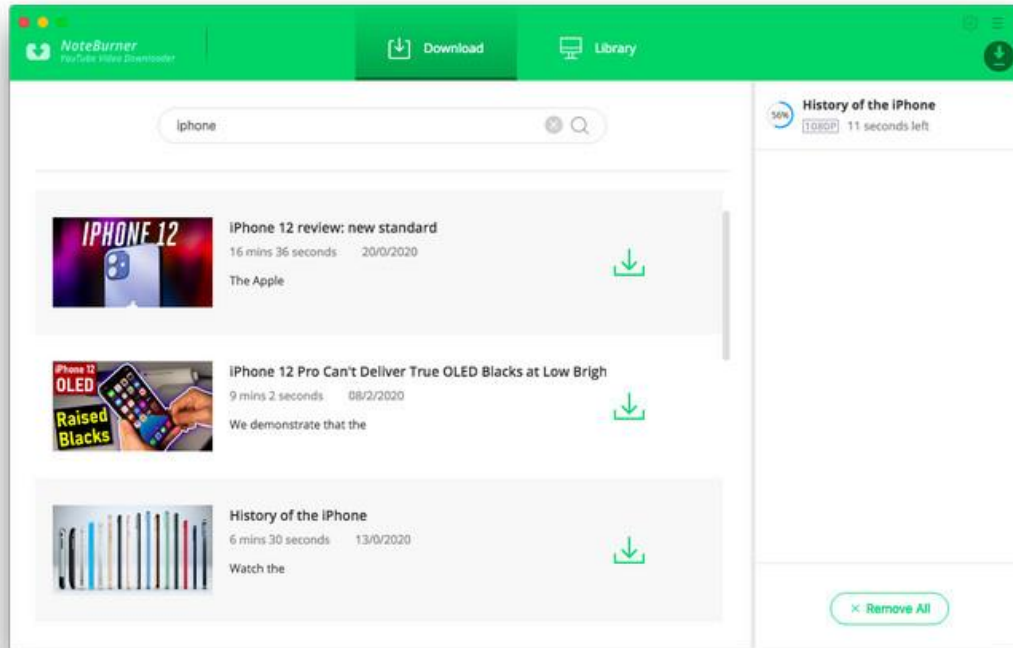

Format: The most common format of YouTube video is MP4 with AAC audio codec. NoteBurner definitely supports downloading the video in MP4 format and extracting audio in AAC format. Plus, video format "MKV" and audio format "WebM" are both supported.

NoteBurner YouTube Video Downloader for Mac

Start Downloading Video

After completing the above steps, now the final step is clicking the download icon to start downloading the video to the output folder you've chosen in the previous step.

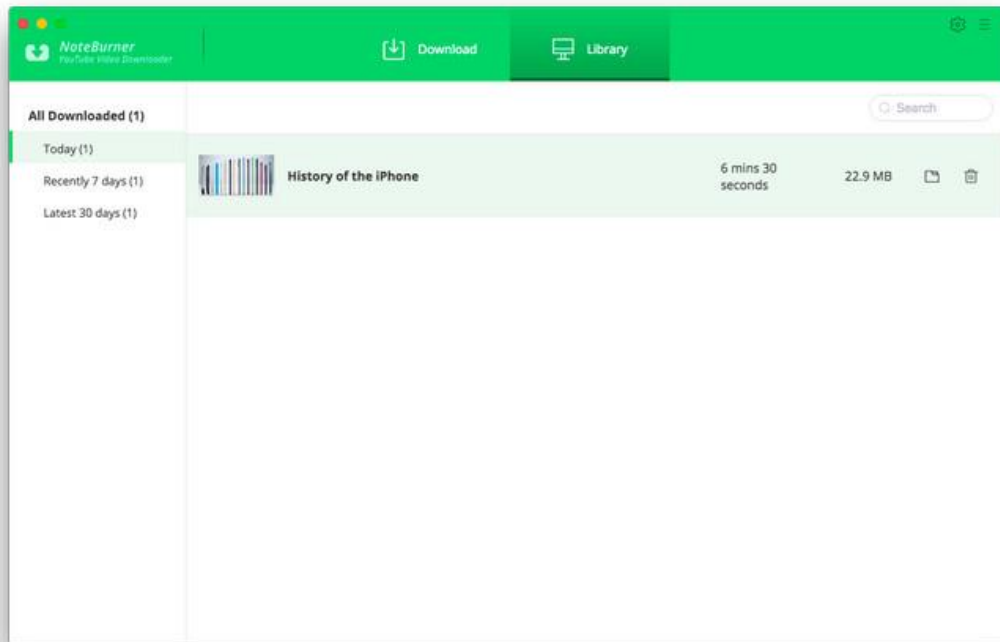

NoteBurner YouTube Video Downloader for Mac

Check Download History

Once the download is done, you can find the downloaded video in MP4/MKV format or the downloaded music in MP3/WebM format by clicking the "Library" button or just opening the output folder.
